Personal Profile

2 Years of experience in developing and designing iOS, iPadOS, and watchOS applications. I'm always passionate about developing a fast and reliable application. Throughout my carrier, I've developed applications from scratch to release, Implement enhanced features in big projects.

Skills

Concepts	Data Structures, OOPS, MVC, MVVM-C, RESTful APIs, App Store Publishing.
Language & Tools	Swift, C++, Xcode, Git, JIRA, SourceTree, CocoaPods, Swift Package Manager, Charles.
Frameworks & Library	SwiftUI, UIKit, Combine, Firebase, Swift Charts, Concurrency, CoreData.

Work Experience

Adobe Systems (via Hughes Systique Corporation) (PSX App)   *Noida, India*

iOS Developer   *Apr 2023 - Present*

- Valuable contributor to the growth team for a popular photo editor Adobe PSX with millions of users, maintaining an impressive 4.8 rating from around 700K users.
- Led user interaction and retention efforts, boosting engagement.
- Engineered a captivating image editor tool selection and deselection feature with animated effects in Objc.
- Ensured seamless light and dark theme support throughout the app.
- Initiated experiments with A/B variants in different countries, using adobe analytics to elevate successful variants to global features.

Simform Solutions (AI-Health App)   *Ahmedabad, India*

iOS Developer   *Jul 2021 - Feb 2023*

- Working on Fitness application which works over Apple devices **(iPad, iPhone, watchOS).**
- Working with 5 person's team in a remote environment and providing fast deliveries of new features.
- Improved legacy code and apply **MVVM architecture** as well as **SwiftUI framework** for new features and redesigned screen.
- Refactor more than 80% watchOS screens to SwiftUI framework.
- Implement **pixel-perfect** designs provided by designer.
- **Technology Stack:** UIKit, SwiftUI, Networking, Concurrency, Firebase, AVFoundation, Swift Charts, etc.

Jain Fast Food (App Link)   *Remote, India*

iOS Developer   *Oct 2020 - Mar 2021*

- Developed iOS application from scratch and Publish it on **App Store.**
- Developed **Admin** iOS application which monitors profits, Add and modify the client side app data.
- Used Combine Framework to ensure that the user authenticates perfectly.
- **Technology Stack:** SwiftUI, Firebase, Push Notification, JSON Parsing, Combine, CoreLocation, SDWebImage, etc.

Projects

SSLineChart (Link)   *Ahmedabad, India*

Open Source Project

- Developed an open-source library exclusively for watchOS, offering the unique capability to create gradient-based line charts in Swift.
- Implemented functionality for drawing gradient elements, meeting the demand for visually appealing data representation on watchOS platforms.

Education

Arya College Of Engineering And IT   *Jaipur, India*

BTech in Information Technology (**7.1 CGPA**)   *2017 - 2021*

Certificate & Achievements

Present	**Leetcode,** Solved **200+** data structure and algorithm problems	*Link*
Dec 2019	**Udemy,** The Complete iOS App Development Bootcamp	*Link*
Oct 2019	**University of Toronto,** Introduction To Swift Programming	*Link*
