Work Experience

eBay (TCGplayer App) — Bangalore, India
Senior Software Engineer — July 2026 – Present

- Building the **TCGplayer iOS app**, a trading card marketplace and collection tracker used by **1M active users**.
- Shipped **PAX Australia onboarding** for TCGplayer's **Australia launch** and redesigned the **Account & Settings** experience.
- Built an in-app **debug menu** to override **feature flags** and **experiments** at runtime, speeding up QA and experiment validation.
- Integrated **MetricKit** to track on-device performance and diagnostics in production.

Meesho (Meesho App) — Bangalore, India
Senior Software Engineer — April 2025 – June 2026

- Architected an **AI-assisted developer toolchain** using **Claude Code** — custom skills for **project-wide file indexing** and **dependency graph mapping**, plus **autonomous AI agents** that auto-generate PRs from branch diffs and resolve reviewer comments.
- Architected **zero-dependency App Extension binaries** across Notification Service, Widget, and Share targets; instrumented **MetricKit** crash diagnostics to surface previously invisible extension-level failures.
- **Pioneered feature modularization** by extracting **Help Center** & **Navigation** into independent modules, then offset the size increase by **4 MB** with **Mergeable Binaries**.
- Reduced iOS app size by **6.2 MB (71.1 → 64.9 MB)** by migrating from CocoaPods to SPM, improving **Kaizen metrics**.
- Built production alerting on Meesho's in-house **Signal system**, achieving **90% alert accuracy** and reducing incident detection time.
- Shipped **Personalized First Order Discount** (**10% 1ODNR, 5% NMV growth**) and **Sale Revamp** (**15% O/DAU uplift**).

Walmart Global Tech (Walmart App) — Bangalore, India
Software Engineer III — Mar 2024 – April 2025

- Owned and enhanced **Apparel item pages** in the Walmart iOS app, improving product discovery and conversion on high-traffic e-Commerce screens.
- Integrated **Bazel** build system into the iOS pipeline, reducing incremental build times and accelerating developer iteration cycles.
- Shipped **Complete the Look** cross-sell feature and **Dynamic Size Guide** with personalized recommendations, targeting return rate reduction.

Adobe Systems (via Hughes Systique Corp.) (Photoshop Express) — Noida, India
Software Engineer — Mar 2023 – Mar 2024

- Contributed to the Adobe PSX **Growth team**, helping maintain a **4.8-star rating** with **700K+ reviews**; architected seamless **light/dark theme** support.
- Designed and executed multi-country **A/B experiments** using **Adobe Analytics**, promoting successful variants to global features.
- Built a **Python-based A/B infrastructure** for language localization, automating variant management across **20+ locales**.

Simform Solutions (AI-Health App) — Ahmedabad, India
Software Engineer — Jul 2021 – Feb 2023

- Revamped legacy codebase by implementing **MVVM** architecture and integrating **SwiftUI**, resulting in a **40% reduction in app crashes**.
- Refactored **80%+ of watchOS screens** from UIKit to SwiftUI, modernizing the codebase and reducing UI development time.
- Delivered cross-platform features across **iPad, iPhone, and watchOS** in a 5-person remote team, consistently meeting sprint commitments.

Projects

SSLineChart (Link) — Ahmedabad, India
Open Source Library

- Developed an open-source **watchOS charting library** in Swift with gradient-based line chart rendering; published on GitHub, adopted by health/fitness developers.

Skills

Concepts	Data Structures, OOP, Multi-Threading, MVVM-C, MVC, Protocol-Oriented Programming, RESTful APIs, App Store Publishing
Languages & Tools	Swift, Objective-C, C++, Xcode, Git, JIRA, CocoaPods, Swift Package Manager, Bazel, Charles, Proxyman, Claude Code
Frameworks	SwiftUI, UIKit, Combine, Structured Concurrency, CoreData, Firebase, Swift Charts, XCTest, MetricKit

Education

Arya College of Engineering and IT — Jaipur, India
BTech in Information Technology — 2017 – 2021
